*Improve Your View with Crown*

## LET THE SUNSHINE IN...

Since 1955, Crown Windows and Sunrooms has been manufacturing and distributing quality sunroom products.

Satisfying customers has come by following a simple philosophy. We provide our customer with an industry leading product at a fair price and back that product with our dependable warranty.

The new Super room is a perfect example of an industry leading product. The Super room is a composite structure which combines the strength of wood with the easy maintenance of vinyl.

We also give our customers the advantage of dealing with a manufacturer. Our factory in Davison, Michigan produces everything from wall and roof panels to window and glass units. This allows you the ease of working with one company from start to finish.

At Crown we don't see you as just another customer. From the start we have been family owned and operated, giving you the personal attention you would expect from a family owned business.

We have manufactured, installed and serviced sunrooms for half a century. So see what you've been missing and let us improve your view with a new Super room from Crown Windows and Sunrooms. ☺

**CROWN Super-Room™**  
LET THE LIGHT SHINE IN

A bright and cheerful room for any lifestyle you choose can be yours.

The Super Room can be a family fun room, recreational room, exercise room, game room or hot tub room. But most of all, a room to just relax in!

*What makes it Super?*

**CROWN'S EXCLUSIVE  
COMPOSITE WALL STRUCTURE**

Crown has separated itself from the competition with our new composite wall. We have been nationally recognized for this product innovation. The exclusive composite is a mix of wood and vinyl which gives the super room greater thermal efficiency and increased structural integrity. To enhance the beauty of the room we have also added an internal bracket system that eliminates bulky screw heads. All these attributes combined give you a strong, efficient and beautiful addition to your home.

- Blends in with all types of architecture
- Rapid installation system
- Maintenance Free Construction
- Colors Available: White, Beige and Sandstone

### INSULATED ROOF SYSTEM

Snow loads are always a concern in northern climates, but with our roof we eliminate those concerns. Crown uses an extruded I-beam a minimum of every 4' to provide strong support. Panels also resist surface damage, chalking and acid rain with a Krystal Kote finish. Gable and studio are options for roof style, and gutter and downspout are included for proper drainage away from your house and enclosure room.

### INSULATED VINYL WINDOWS

Enclosure windows are manufactured in our 60,000 sq.ft. factory. The window design is built specifically for enclosure walls. They have a hefty support system allowing them to support the large spans typical in super rooms. Our insulated glass unit includes the "super spacer" allowing you to stay warm on those chilly nights or cool on a sunny summer day.

### NON-DENT VINYL INSULATED PANELS

Our factory manufacturers all roof and wall panels used in our rooms. Vinyl panels are used as filler above, below and around windows for strength and premium insulation. The vinyl skin gives you the benefit of a non-dent panel so you can be worry free while entertaining children, moving furniture or mowing the lawn.

### SIX-INCH POLY DECK

Our poly deck consists of panels with five inches of insulation sandwiched between two 1/2" Oriented Strand Boards. Poly Decks eliminate costly foundation work and finished surface can be carpet, tile or almost any type flooring.

Do you want to enjoy the outdoors in a new Patio Room, but don't need a Super Insulated Wall to do it?... A three season Leisure Time Room can be your solution! Enjoy the outdoors year after year in a Leisure Time Room designed and built for you.

Of all the possibilities, few will return as many pleasures as your new Leisure Room. It can add increased value to your home, help lower heating and cooling costs and protect your valuable patio furnishings. All of this can be accomplished for a surprisingly low investment in your home.

- Blends in with all types of architecture
- Rapid installation system
- Maintenance Free Construction
- Colors Available: White, Beige and Sandstone

### THE 3 SEASON LEISURE ROOM

Relax in this single pane glass and screen room from early spring through late fall. Enjoy the outdoors without the bugs, dust and rain. The Leisure Time Room features our great insulated roof system and a sturdy 2" aluminum wall structure.
